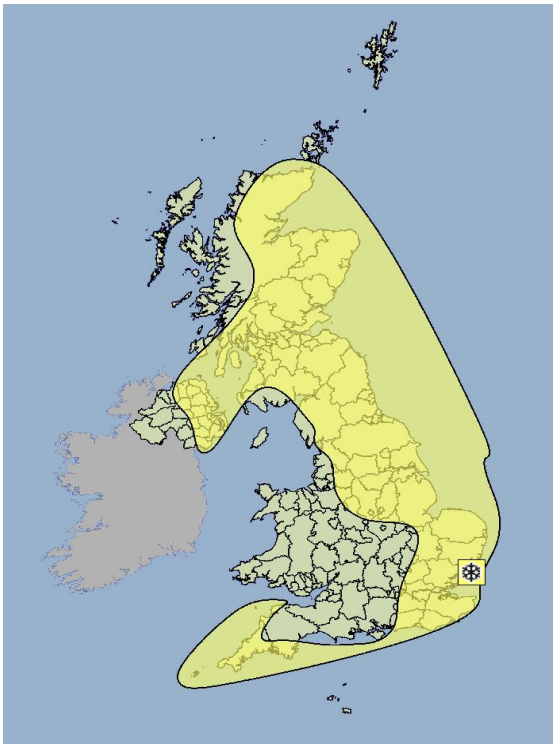
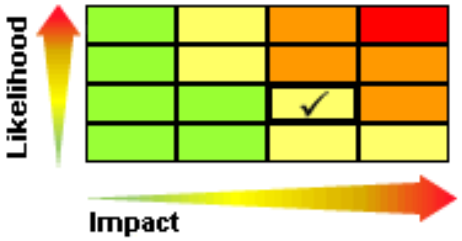
National Severe Weather Warning Service





Chief Forecasters Assessment
Snow showers will bring variable snow cover, with the potential for 10-15 cm of snow where showers are most frequent in the north, while nearby locations may see only 1 to 4 cm. Southeastern areas of England should see overnight showers ease. Strong winds will lead to drifting of snow and severe wind chill, while lightning could be an additional hazard, particularly near coasts.

The warning area has been updated to extend it a little further west across The Isles of Scilly, southeast England and the Midlands. Amber warnings are in force for areas considered more likely to see impacts.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **05:05 on Wed, 28th Feb 2018** until **23:55 on Wed, 28th Feb 2018**

Heavy snow showers are expected on Wednesday.

There is the potential for travel delays on roads, with some stranded vehicles and passengers, as well as delays or cancellations to rail and air travel. Some rural communities could become cut off. Power cuts may also occur and other services, such as mobile phones, may be affected.
